\$\$\$ (Q. 1-10):

Read the following passage carefully and answer the questions. Certain words/ phrases have been given in bold to help you locate them while answering some of the questions.

Ahimsa is only in books and not in practice. In the modern era the value of everything has gone except that of life, especially human life. The life of an individual is a gift from God. As a gift, it is to be treasured and treated as a very valuable possession. No one has the right to destroy it or harm it. In spite of all scientific progress, man is not able to create life. Only God can do it. How can man dare to destroy what he cannot create?

Animals and plants, too, have life. Their life is precious to them. They, too, are not to be harmed or destroyed for man's pleasure.

Ahimsa is not against self-protection or self- **preservation**. Sometimes it may be necessary to kill or to injure others as in wars. Punishments **meted out** to wrong doers, anti-social elements, etc cannot be considered as wrong. Man needs food to survive. Killing of animals can be justified as long as it is to satisfy the need for food or to prepare certain medicines. The same is true of plants. Animals which are harmful to man can also be destroyed, for man is more important than any of the other creatures. Killing of mosquitoes, locusts, rats and other pests may similarly be justified. Killing them for mere pleasure is certainly wrong.

There is also positive side to ahimsa. It says, "Thou shalt love, respect, honour and help everyone." Buddha, Mahavira, Jesus Christ, Guru Nanak and other religious founders **stressed** the positive side of ahimsa as well. It is not enough to refrain from certain wrong actions but it is essential to do certain things. Mahatma Gandhi, the father of our nation, who is well-known for his propagation of ahimsa, gave more importance to this positive side.

The practice of ahimsa should start when we are young. Certainly we do not kill anyone at that age. However, we may be **guilty** of several actions which are against ahimsa. Thinking ill of others, criticising them and destroying their reputation are certainly not praiseworthy. Not treating others as equal, discounting their abilities and not assisting them in times of need are also to be treated as sins against ahimsa.

The best way to practise ahimsa is to consider all creatures as God's children. This will help us treat life with love and respect. It will prevent us from doing any harm to ourselves as well as to others, including animals and plants.

The practice of ahimsa should not be an excuse to accept injustice and to suffer patiently. Ahimsa is not against opposition. It is against violence. Gandhiji has shown us the way to oppose injustice without violence. His method was peaceful and non-violent. It is satyagraha or non-cooperation. It is a very effective method as is seen from the way he **ousted** the British from the Indian soil.

Central budget **(26)** for agriculture are far less significant than the collective budgets of the states because agriculture is a state subject. While giving Aadhaar legal **(27)** and linking it to welfare programmes is Parliament's **(28)**, it is in the states that implementation will actually take place and where every sharecropper and tenant's name has to be recorded in the land records. These — and not the budget — will be the tipping points to achieving **(29)** rural change. The time for universally applicable, pan-India policy has passed. Less than 100 districts have 80 per cent of India's poor and most of these are drought-prone. Funding has to be **(30)** keeping this in mind.
